

Clinical/Commercial Permissions – Three Basic Types

- 1. INTERNATIONAL TEST PARTNERS:** If you represent a qualified test publisher that is interested in publishing a language adaptation/translation of a WPS proprietary title for formal distribution, WPS Rights & Permissions welcomes the chance to develop a new relationship or deepen an existing one. For more information, contact rights@wpspublish.com.
- 2. PHARMACEUTICAL AND OTHER FOR-PROFIT CLINICAL TRIALS:** If your case report format needs prevent you from using original test materials purchased directly from WPS and shipped from our warehouse, or if you need permission to use our materials in translation (including permission to create a translation for use in a specific clinical trial), WPS Rights & Permissions can help your team secure a limited-use licensing arrangement specific to your adaptation/language requirements. Following an authorized officer's signature to our terms and prepayment of per-use fees (generally equivalent to the purchase of original test materials), WPS will grant permission to create and reprint the adapted measure under WPS copyright for a specified number of uses as part of a single WPS-registered project (with reuse subject to new approval/license). Contact rights@wpspublish.com with a brief description of your trial's needs and we'll be glad to assist with the project.
- 3. CONSULTANTS AND OTHER FOR-PROFIT APPLICATIONS:** If you seek to customize the format of WPS proprietary materials for use within consultancy work or another for-profit application, WPS Rights & Permissions will be glad to explore the possibility of entering into a multiyear licensing agreement. Contact rights@wpspublish.com with a brief description of your needs and we'll be glad to assist with your work.
